Databases: PostgreSQL, MySQL, SQLite, Firebase

Tools: Git, GitHub, GitHub Actions, Docker, AWS, Azure, Vercel, Render, VS Code, IntelliJ, Android Studio, Linux

EXPERIENCE

SolarShare

Jan 2025 – Present

Co-Founder & Full-Stack Developer | 1st Place, 2025 PSEGLI Innovation Challenge

Farmingdale, NY

- Won 1st place among 15 teams at the 2025 PSEGLI Innovation Challenge by conceiving SolarShare on the spot and pitching in under 4 minutes, then competed against 44 university teams at the 2026 National Hult Prize in Boston
- Architected a solar energy marketplace with FastAPI, Next.js, and TypeScript featuring payment rails, 3-role RBAC, and 4-stage billing lifecycle for real-time consumer-to-solar-farm energy transactions
- Modeled 12-month seasonal energy savings with rollover logic and a live utility rate refresh pipeline across 3+ NY regions, making all financial projections transparent and auditable

Java / Flutter Developer Intern

May 2025 – Aug 2025

Shop Online New York, Remote

- Developed 10+ REST APIs in Java with MySQL integration, cutting average response time by 20% and handling 500+ daily transactions
- Shipped a production Flutter app in Dart with Firebase and BLoC state management, improving cross-platform performance by 30% in the Sonny-App project

Help Desk Technician

Dec 2022 – Mar 2023

Farmingdale State College

Farmingdale, NY

- Resolved 40+ monthly support tickets across Windows and macOS systems for students and staff via remote and in-person troubleshooting
- Documented 100+ requests in the ticketing system, reducing repeat issue resolution time and improving team response efficiency

PROJECTS

Zowe Client Java SDK – LFX Mentorship | Java, REST API, Maven | Linux Foundation

May 2026 – Present

- Selected for the Linux Foundation LFX Mentorship to contribute production Java code to the open-source Zowe SDK, which provides programmatic access to IBM z/OS mainframes powering global financial, healthcare, and government systems
- Implementing 11 SDK methods for the complete z/OSMF Workflow REST API lifecycle, enabling enterprise developers to automate mainframe operations using modern Java and Maven pipelines

FitGPT – AI Wardrobe Assistant | FastAPI, React, PostgreSQL, Kotlin, Groq API

Feb 2026 – May 2026

- Owned backend development as team Backend Developer, building a FastAPI and PostgreSQL service with JWT auth, Google OAuth, and weather-driven outfit planning via OpenWeather API for 175+ wardrobe items
- Shipped 12+ features across 3 Agile sprints with 185+ pytest tests and full GitHub Actions CI, covering seasonal rotation, duplicate detection, and trip packing

StockVision – AI Stock Forecasting | React, Python, Prophet, ARIMA | AI4ALL Ignite Certified

Jun 2025 – Aug 2025

- Earned AI4ALL Ignite certification by implementing Prophet and ARIMA models on 3+ years of Kaggle data, improving short-term prediction accuracy by 15% over baseline
- Built a React dashboard with dynamic visualizations presented to 50+ mentors, attracting 100+ demo users at the program showcase
