

MUHAMMAD IMRAN

Long Island, NY | 929-866-9119 | imranabdullah926@gmail.com | MuhammadImran.tech

EDUCATION

Farmingdale State College

Farmingdale, NY

Bachelor of Science in Computer Science, Minor in Applied Mathematics, President's List

Expected May 2026

- Relevant Coursework: Data Structures, Algorithms, Software Engineering, Database Management Systems, Web Development, Object-Oriented Programming, Computer Networks, Operating Systems

TECHNICAL SKILLS

Languages: Java, Python, F#, C++, SQL, JavaScript, HTML/CSS

Frameworks: React, Node.js, JavaFX, Spring Boot

Developer Tools: Git, GitHub, Linux, Docker, Microsoft Azure, AWS, VS Code, IntelliJ, Eclipse, PyCharm, Visual Studio, Microsoft 365, Adobe Suite, Lucidchart, Google Colab

EXPERIENCE

Java / Flutter Developer Intern

May 2025 – Present

Shop Online New York, Remote

- Developed backend features with Java by building 10+ RESTful APIs, integrating MySQL, and writing scalable logic, which reduced average response time by 20% and supported 500+ daily transactions
- Completed Flutter internship by shipping a production mobile app using Dart, Firebase, REST APIs, and BLoC, which lifted cross-platform performance by 30% and improved user satisfaction in the Sonny-App project

Tech Fellow – Technical Interview Prep (Intermediate)

Jun 2025 – Aug 2025

CodePath, Remote

- Mentored 30+ students in algorithms and data structures by leading 15+ breakout rooms, modeling UMPIRE, and running live debugging sessions, which increased reported confidence by 40%
- Guided weekly discussions, answered 100+ Slack questions, and coordinated mock interviews and resume reviews, which improved job readiness for 90% of participants

Backend Developer – FinTrack

Jan 2025 – Present

Collaborative Group

- Designed and implemented 6+ entities and REST APIs with Spring Boot and Java, which enabled finance tracking for 200+ simulated accounts
- Set up backend architecture in IntelliJ, added GitHub branching workflow, and configured JPA repositories, which cut merge conflicts by 50% during team sprints

PROJECTS

FinTrack – Finance Management System | Java, Spring Boot, REST APIs, MySQL

Jan 2025 – Apr 2025

- Built backend with 6+ entities and REST APIs in Spring Boot and Java, which handled 200+ daily financial transactions and user actions
- Integrated JPA repositories with MySQL and set up GitHub workflows, which improved version control efficiency by 40% across a 4-person team

StockVision – AI-Driven Stock Forecasting | React, Python, Prophet, ARIMA

Jun 2025 – Aug 2025

- Worked in a 5-person AI4ALL Ignite team to build a React web app with dynamic charts and API integration, which attracted 100+ demo users at the showcase
- Implemented Prophet and ARIMA on 3+ years of Kaggle data, which improved short-term prediction accuracy by 15% over baseline and was presented to 50+ mentors

Event Website Project | HTML, CSS, JavaScript

- Developed a responsive event site with countdown, embedded video, testimonials, and theme toggle using localStorage, which increased visitor engagement by 25%
- Built an interactive RSVP form with DOM updates and participant counts, which processed 150+ sign-ups **Live Site:** <https://sage-lively-needle-305.vscodeedu.app>
