Software Engineer | Java, Python, FastAPI, React, REST APIs

Software engineer with 11 production Java methods merged into the Zowe Client Java SDK 7.0.0 release (PRs #514, #531, #560; credited by name) and a FastAPI backend shipped with 800+ automated tests in CI/CD. Software Support Technician at BRdata (6,500+ live installations).

Education

Farmingdale State College — Farmingdale, NY
B.S. Computer Science, Minor in Applied Mathematics, President's List — *May 2026*

Georgia Institute of Technology — Online
M.S. Computer Science (OMSCS, starting Spring 2027)

Technical Skills

Languages: Java, Python, TypeScript, JavaScript, SQL
Frameworks: Spring Boot, FastAPI, React, Next.js
Databases: PostgreSQL, MySQL
Tools: Git, GitHub Actions, Maven, CI/CD, REST APIs
Practices: Unit Testing (JUnit, pytest), Agile/Scrum

Experience

BRdata Software Solutions — Jun 2026 – Present
Software Support Technician — *Melville, NY*

- Automated BRdata's daily version backup, cleanup, and installation workflow in PL/B, eliminating a manual daily process; the script became the team-wide standard
- Diagnosed and resolved production issues on an enterprise grocery platform serving 2,500+ retail clients at 6,500+ live installations, tracing root cause through SQL and application logs; closed 50+ cases end to end

Zowe Client Java SDK – Linux Foundation LFX Mentorship — May 2026 – Sep 2026
LFX Mentorship Graduate | Java, REST API, Maven — *Remote*

- Selected from a global applicant pool to implement 11 production Java methods for the z/OSMF Workflow REST API, merged into SDK 7.0.0 and credited by name in the release notes
- Shipped Java REST APIs for z/OSMF workflow archive listing and deletion (PR #514) and system variables (PR #531); fixed a live request-handling bug (PR #560) validated on IBM z/OS hardware

SolarShare — Jan 2025 – Jun 2026
Co-Founder & Full-Stack Developer — *Farmingdale, NY*

- Won 1st of 15 teams in the 2025 PSEG Long Island Innovation Challenge with a solar marketplace on FastAPI, Next.js, and TypeScript (3-role RBAC, 4-stage billing); advanced to the 2026 Hult Prize USA East

FinTrack — Jan 2025 – Mar 2025
Backend Developer (Contract) | Java, Spring Boot, JPA, MySQL — *Remote*

- Built a Java/Spring Boot finance backend with 6+ entities and REST APIs processing 200+ daily transactions

Projects

AURA Forge | *LLM Agents, MCP, Policy-Gated Workflows* | LaunchCode Agentic Engineering Capstone — Aug 2026

- Raised AURA Forge's evaluation score from 44/48 to 48/48 while cutting model cost 19% and model time 41%, by routing AI-assisted changes through risk-tiered policy gates with human review on high-risk changes

FitGPT — AI Wardrobe Assistant | *FastAPI, PostgreSQL, React, Kotlin* — Feb 2026 – May 2026

- Owned the FastAPI backend for FitGPT, an LLM wardrobe product on Groq and Llama 3.1: 12+ features shipped across 3 sprints with JWT auth and Google OAuth
- Backed the backend with 800+ automated tests running in a GitHub Actions CI/CD pipeline

Certifications

CodePath Tech Fellow, LaunchCode AI 101, AI4ALL Ignite, Anthropic: Claude Code in Action, MCP: Advanced Topics
