EXPERIENCE

BRdata Software Solutions

Jun 2026 – Present

Software Support Technician

Melville, NY

- Resolve software issues for 2,500+ grocery retail and wholesale clients across 6,500+ US installations via ticketing system, phone support, and remote troubleshooting
- Install, configure, and QA 14+ enterprise software modules including inventory management, price optimization, WMS, and loss prevention; document solutions to reduce repeat client resolution time

SolarShare

Jan 2025 – Present

Co-Founder & Full-Stack Developer | 1st Place, 2025 PSEGLI Innovation Challenge

Farmingdale, NY

- Architected a solar energy marketplace (FastAPI, Next.js, TypeScript) with payment rails, 3-role RBAC, and a 4-stage billing lifecycle for real-time consumer-to-solar-farm energy transactions
- Built a financial modeling engine with 12-month seasonal energy savings projections, rollover logic, and automated utility rate refresh across 3+ NY regions for fully auditable consumer billing

Java / Flutter Developer Intern

May 2025 – Aug 2025

Shop Online New York, Remote

- Engineered 10+ RESTful APIs in Java with MySQL integration, reducing average response time by 20% and sustaining 500+ daily transactions in a production environment
- Shipped a cross-platform Flutter app in Dart with Firebase and BLoC state management, improving performance by 30% across Android and iOS in the Sonny-App project

Help Desk Technician

Dec 2022 – Mar 2023

Farmingdale State College

Farmingdale, NY

- Resolved 40+ monthly support tickets across Windows and macOS for students and staff via remote and in-person troubleshooting with detailed case documentation
- Built a 100+ entry knowledge base in the ticketing system, cutting repeat issue resolution time and streamlining team response workflows

PROJECTS

Zowe Client Java SDK – LFX Mentorship | Java, REST API, Maven | Linux Foundation

May 2026 – Present

- Selected from global applicants for the Linux Foundation LFX Mentorship to implement 11 production-grade Java methods for the Zowe SDK, enabling IBM z/OS mainframe access for financial, healthcare, and government enterprises
- Building the complete z/OSMF Workflow REST API lifecycle, giving enterprise developers a modern Java and Maven interface to automate mainframe operations at scale

FitGPT – AI Wardrobe Assistant | FastAPI, React, PostgreSQL, Kotlin, Groq API

Feb 2026 – May 2026

- Led backend development in an Agile team, architecting a FastAPI and PostgreSQL service with JWT auth, Google OAuth, and weather-driven outfit recommendations for 175+ wardrobe items; delivered 12+ features across 3 sprints with 185+ pytest tests and a GitHub Actions CI/CD pipeline

StockVision – AI Stock Forecasting | React, Python, Prophet, ARIMA | AI4ALL Ignite Certified

Jun 2025 – Aug 2025

- Implemented Prophet and ARIMA models on 3+ years of Kaggle market data achieving 15% accuracy gain over baseline; built a React dashboard demoed to 50+ mentors, attracting 100+ users at the AI4ALL Ignite showcase
