Software engineer with production Java merged into the Linux Foundation Zowe SDK 7.0.0 release and a FastAPI and PostgreSQL product backend validated by 800+ automated tests in CI/CD. Currently a Software Support Technician at BRdata, supporting an enterprise platform across 6,500+ live installations.

Education

Farmingdale State College — Farmingdale, NY
B.S. Computer Science, Minor in Applied Mathematics, President's List — *May 2026*

Georgia Institute of Technology — Online
M.S. Computer Science (starting Spring 2027)

Technical Skills

Languages: Java, Python, TypeScript, JavaScript, SQL
Frameworks: Spring Boot, FastAPI, React, Next.js
Databases: PostgreSQL, MySQL
Tools: Git, GitHub Actions, Maven, Docker, CI/CD, REST APIs
Practices: Data Structures & Algorithms, Unit Testing (JUnit, pytest), Agile/Scrum

Experience

BRdata Software Solutions — Jun 2026 – Present
Software Support Technician — *Melville, NY*

- Diagnose and resolve production software issues for 50+ client cases on an enterprise grocery platform serving 2,500+ retail clients across 6,500+ live installations
- Automated the version backup, cleanup, and installation workflow using PL/B batch scripting, eliminating a manual daily process; adopted as standard practice team-wide

Zowe Client Java SDK – Linux Foundation LFX Mentorship — May 2026 – Sep 2026
LFX Mentee | Java, REST API, Maven — *Remote*

- Selected from a global applicant pool to implement 11 production Java methods completing the z/OSMF Workflow REST API lifecycle; merged into Zowe Client Java SDK 7.0.0 and credited by name in the release notes
- Shipped Java REST APIs for z/OSMF workflow archive listing and deletion (PR #514) and z/OS system variables (PR #531); diagnosed and fixed a live request-handling bug (PR #560), validated on IBM z/OS hardware

SolarShare — Jan 2025 – Jun 2026
Co-Founder & Full-Stack Developer | 1st Place, 2025 PSEG Long Island Innovation Challenge — *Farmingdale, NY*

- Architected a solar energy marketplace (FastAPI, Next.js, TypeScript) with 3-role RBAC, a 4-stage billing lifecycle, and a 12-month savings model; 1st of 15 teams, advanced to the 2026 Hult Prize USA East

Projects

AURA Forge | *LLM Agents, MCP, Policy-Gated Workflows* | LaunchCode Agentic Engineering Capstone — Aug 2026

- Raised AI-assisted change quality from 44/48 to 48/48 on a reproducible evaluation suite by routing engineering changes through risk-tiered policy gates, with high-risk changes held for human review, cutting model cost 19% and model time 41%
- Built the framework fail-closed with an authorization guard, human-in-the-loop review gates, and an operations runbook; demo video: youtu.be/WxEXCWC75vs

FitGPT — AI Wardrobe Assistant | *FastAPI, PostgreSQL, React, Kotlin* — Feb 2026 – May 2026

- Owned the FastAPI and PostgreSQL backend end to end, delivering 12+ features across 3 Agile sprints with JWT auth and Google OAuth, backed by 800+ automated tests in a GitHub Actions CI/CD pipeline; relaunching soon
- Integrated the Groq API (Llama 3.1) for weather-driven outfit recommendations and built the Android client solo in Kotlin with Jetpack Compose

Certifications

Anthropic (2026): Claude Code in Action; Model Context Protocol: Advanced Topics · LaunchCode (2026): AI 101 · AI4ALL (2025): Ignite Accelerator · CodePath (2025): Peer Mentor Recognition
